

September 2017
Superintendent's Message

School is back in full swing at Buckeye Local School District. We are excited to have welcomed students, as well as new staff members, back to school. From elementary to high school, we are happy to have filled these positions with staff who are passionate about the education of the young people in our community.

Buckeye is proud of the education we provide to our students each day. We start early in their lives to begin to point them in the right direction. We see our students as valued individuals who have the right to equal opportunities in developing individual abilities.

Our teachers use a variety of teaching strategies to address various learning styles as well as engage in professional development opportunities to enhance teaching. Our students are encouraged to participate in extracurricular activities to broaden their learning experience.

Our mission is to offer an education that provides rigorous standards of academic excellence in a safe and nurturing environment; to partner in relationships with parents and the community both inside and outside the classroom; and to instill and develop character, servant leadership and a desire for lifelong learning in our students.

Back to school means many new beginnings. I encourage you to join us in supporting our neighborhood, school and community environment. We are looking forward to what 2017-18 will bring at Buckeye.

Sincerely yours,
Patrick E. Colucci, Sr.
Superintendent of Buckeye Local School District
